Profile

I am Agide Getnet, a motivated second-year student at Addis Ababa University, pursuing a degree in Business Administration and Information Systems. With a strong passion for technology, problem-solving, and scalable digital solutions, I thrive at the intersection of business strategy and software development.

By combining analytical business knowledge with technical expertise in React, Express, SQL, and backend API design, I bridge the gap between strategic decision-making and practical implementation. My projects emphasize scalability, cultural identity, reflecting both technical mastery and meaningful impact.

Looking ahead, I aim to leverage my skills to contribute to global technology ecosystems, while showcasing Ethiopia's unique cultural perspective in modern digital platforms.
